

# CVIS Open Workshop Architectures for Cooperative Vehicle-Infrastructure Systems

21 June 2007  
Hotel Hvide Hus  
Aalborg, Denmark

## Agenda

### Time

9:00

### Topics

Workshop start

Keynote: "Is there a "right" architecture for successful deployment?"

Cooperative system high-level architectures - CVIS presentation

Interactive sessions:

- What is the cooperative system functional architecture?
- Which organisations and how are they connected?
- Which information and how should it flow?

Panel discussion (CVIS architecture team)

### Lunch

13:30

Cooperative system application architectures - CVIS presentation

Interactive sessions:

- Which will be the "killer V2I applications"?
- How will users experience these services?
- What opportunities will service/application providers see?

Panel discussion (CVIS architecture team)

16:30

Workshop close
