

PROGRAMME

Demonstration at Göteborg City Race Arena

27 October 2009, 09.00–11.30

In addition to the high level meeting *Future road transport – safe and clean* there will be an opportunity to watch demonstrations and to experience the techniques of today and of the future in the areas of road traffic safety and environmentally friendly road transports.

Please join us at the Göteborg City Race Arena, situated just across the water from the Göteborg Opera house, to be informed in the following topics:

- Advanced systems can assist drivers in avoiding accidents such as collisions. The latest techniques will be illustrated with live demonstrations.
- Concept heavy goods vehicles will be shown to present studies of new and sustainable fuel types. Information will be provided by staff on location.
- Efficiency and reliability are often associated with saving money as well as environment. Find out how all this is achieved in the public transportation sector.
- The next step in intelligent transportations is communication vehicle-to-vehicle (V2V) and vehicle-to-infrastructure (V2I). Take a look into the future intelligent road network.
