Modern
look-and-feel

Showcase for developments: **logica** test sites

- Goals
 - To **prepare**, organise and the various sites to achieve high quality results
 - To **run** the trials ensuring operation of prototypes developed in various projects
 - To **test** the applications and **feedback** on their specifications
 - To ensure sound **data collection** for the evaluations
 - To **demonstrate** developed technologies & applications

Our test site vision

- Netherlands and Belgium
- Hosting CVIS, COOPERS and Safespot
- Preparing for Netherlands – Belgium permanent ‘trial garden’ which can host and test
 - More applications
 - More cars

Characteristics

- 1 closed area containing cross border aspects
- Various locations for different types of applications
- High (freight) traffic volumes (connecting 2 harbours)
- Many legacy systems

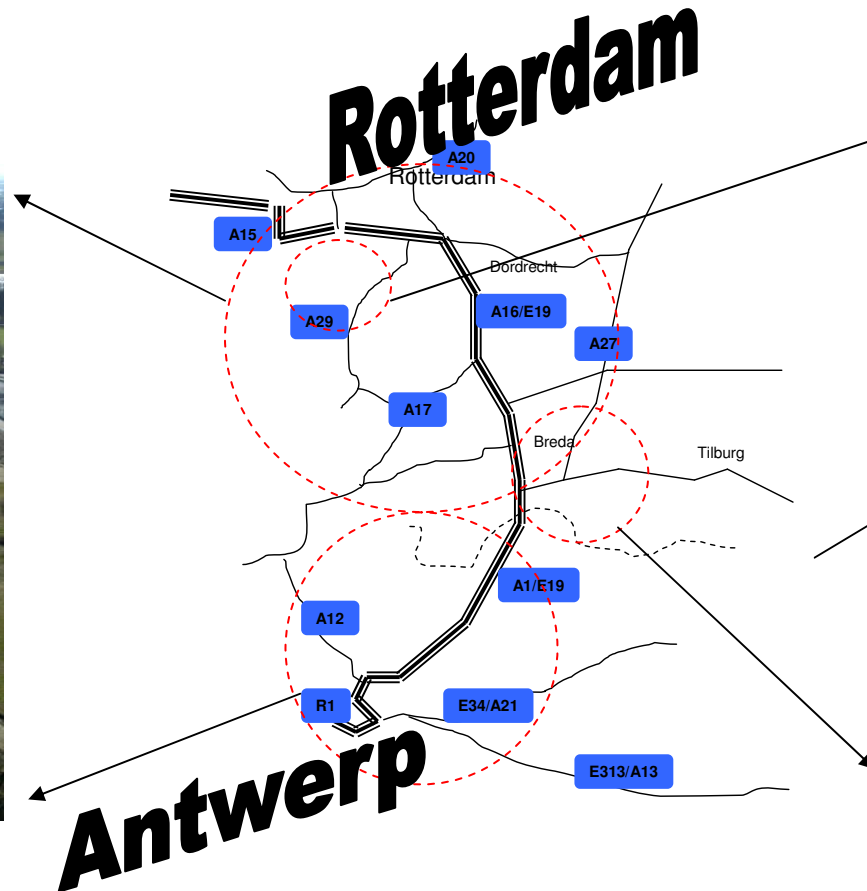

Test region

Netherlands

Belgium

Urban Pilot Rotterdam

Urban Pilot Helmond

Informative Road Brabant 9

Activities in CVIS

- Select locations
- Adapt infrastructure for prototype demonstration
- Prepare cars and install software
- Demonstrate

Location selection

- What prototypes are to be demonstrated?
 - What kind of areas are needed?
- Interurban and Freight and Fleet (Highway resting area)
 - Highways Rotterdam - Antwerp
- Urban applications
 - Intersection with traffic lights (Helmond)
 - DRIP location (Rotterdam)
- Green wave functionality
 - Informative road

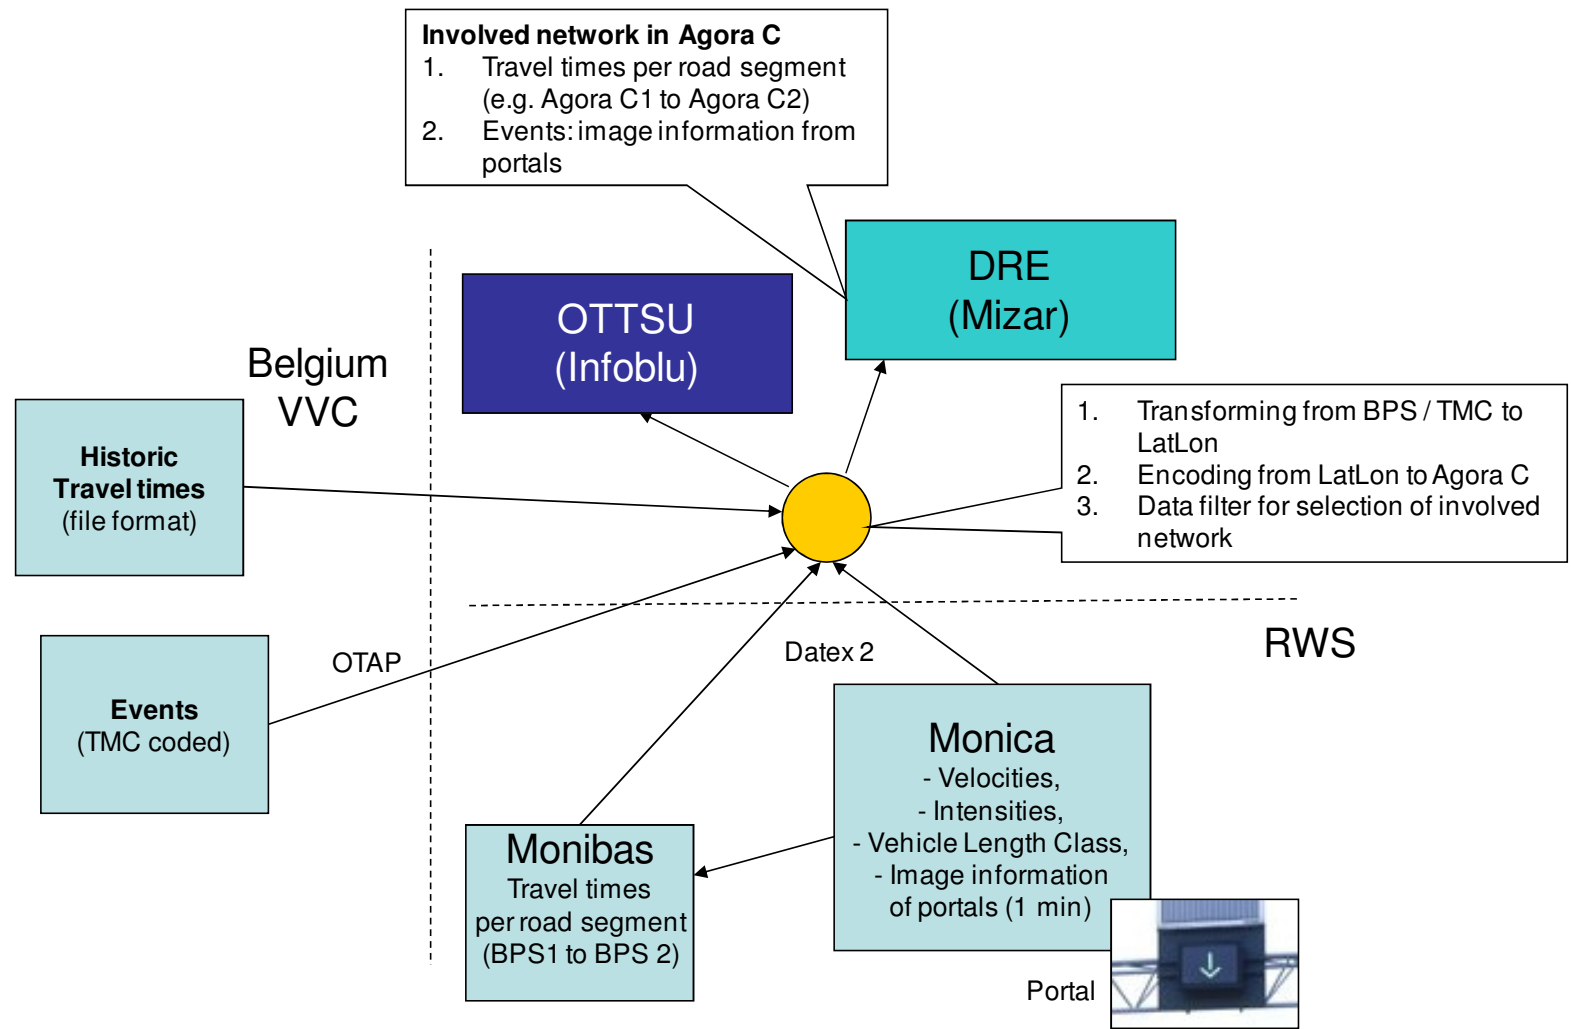

Align with authorities

- Rotterdam – Antwerp stretch
 - Flanders traffic centre (B) – partner
 - Rijkswaterstaat (NL) – partner
- Helmond intersection
 - City of Helmond
- Rotterdam DRIP location
 - City of Rotterdam
- Regional Road
 - Province of Noord-Brabant - partner

Infrastructure adaptation

Infrastructure experiences

- ☹ Netherlands location reference system is not standard
- ☹ not all included roads have inductive loops
- ☹ no dynamic travel times for Flanders
- Translation from local system to LatLon 😊
- Floating Car Data 😊

Prepare cars and boxes

- ☹ No OEM as partner in the test site
 - 😊 Use test cars without canbus data (TNO, Vialis, Logica, Flanders)
 - 😊 DAF trucks as a subcontractor to deliver a truck
- Order hardware: CVIS box
 - 😊 Logica has just received the first unit

To do's

- Install core technologies (enabling software)
- Install software now being developed
- Install screen
- Prepare back office
- DEMONSTRATE

Conclusion

- NL-BE has big ambitions..
- Heading for a permanent test site to
 - Re-use installed hardware and software
 - Gain on experience
 - Allocate resources efficiently
- Technology is the basis, however
- It is all about look and feel
- We are looking forward to demonstrate cooperative systems to a wider audience
